

Short-term or long-term rental

An ingenious solution to help finance your hire or rental requirements. Aquasystems can help if you have failing plant or discharge concerns. Short term or long-term rental options for immediately available aeration equipment.

Tailor-made solutions

Our **short-term** rental formula helps companies in case of an emergency. This can occur in the event of an existing plant failure, low DO or incoming third party illegal discharging.

The **long-term** rental is a solution to assist customers the financial benefits of purchasing an aerator or LOW COST rental for an extended period.

Since our aerators have a long lifetime and consequently a high residual value, you're financing at a significantly reduced purchase price in case of a long-term rental.

You however retain the same rights as if you had opted to purchase.

Long-term commitments can always be adjusted in the course of the contractual term.
